QA Developer Technical Test

Requirements
- **Must be written in Nodejs (you should also install npm)**
- **Java Development Kit (JDK) installed, minimum required version is 7**

Quick Start
1. **Download zip file into your working folder**
2. **Install**

     npm install
3. **Run Test Demo**

     npm test

If the test was successful, you are correctly configured to start the test

The Test

Establish a few scenarios to validate the following web page:
http://todomvc.com/examples/react/#/ and build up a complete browser (End-to-End) test suite.
You can refer to testDemo.js to help you start building your own browser test file.
